THREATENED SPECIES CONSERVATION ACT 1995

Final Determination

THE Scientific Committee, established by the Threatened Species Conservation Act, has made a Final Determination to list the New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion, as a critically endangered ecological community in Part 2 of Schedule 1A of the Act and as a consequence, to omit reference to New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion, from Part 3 of Schedule 1 (Endangered Ecological Communities) of the Act. Listing of Critically Endangered Ecological Communities is provided for by Part 2 of the Act.

The Scientific Committee has found that:

1. New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion is the name given to the ecological community characterised by the species assemblage listed in paragraph 2. This Bioregion is defined by SEWPaC (2012) Interim Biogeographic Regionalisation for Australia, Version 7. A map of IBRA 7 is available at:

<http://www.environment.gov.au/parks/nrs/science/bioregion-framework/ibra/maps.html>.

New England Peppermint (*Eucalyptus nova-anglica*) Grassy Woodland is listed as critically endangered under the Commonwealth Environment Protection and Biodiversity Conservation Act 1999 (TSSC 2011). New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion falls within the definition of the nationally-listed community. However, the Commonwealth listing advice excludes some patches here regarded as New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion on the basis of condition thresholds (including patch size, ground cover and tree density).

- The total species list of the community is considerably larger than that given above, with many species present in only one or two sites or in low abundance. The species composition of a site will be influenced by the size of the site, recent rainfall or drought condition and by its disturbance (including fire) history. The number of species, and the above ground relative abundance of species will change with time since fire, and may also change in response to changes in fire regime (including changes in fire frequency). At any one time, above ground individuals of some species may be absent, but the species may be represented below ground in the soil seed banks or as dormant structures such as bulbs, corms, rhizomes, rootstocks or lignotubers. The list of species given above is of vascular plant species; the community also includes micro-organisms, fungi, cryptogamic plants and a diverse fauna, both vertebrate and invertebrate. These components of the community are poorly documented.
- New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion is dominated by trees of *Eucalyptus nova-anglica* and occasionally with *E. dalrympleana* subsp. *heptantha*, as a co-dominant. The tree layer is usually 8-20 m tall with a sparse cover up to 30%. There are few shrub species present, and none are abundant within the community (Benson and Ashby 2000). Ground cover is usually dense with *Asperula conferta*, *Poa sieberiana*, *Themeda australis*, *Juncus filicaulis*, *Dichondra repens*, *Carex inversa*, *Rumex brownii*, *Acaena ovina* and *Desmodium varians* common. There is some variation in the structure due to different stages of regrowth after clearing or dieback (Benson and Ashby 2000).
- New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion is described in Benson and Ashby (2000) who list species to provide a guide to identification of the community. Care should be taken in the application and interpretation of indicator plant species because of sampling limitations and the reduction in species diversity in degraded sites. In addition, at certain times some species may only be present at a site at some times as a soil seed bank or as dormant buds or tubers.
- New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion occurs primarily in valley flats subject to cold air drainage.
- New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion is referable to 'New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalt' (Community 8) and 'New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Sediment' (Community 9) of Benson and Ashby (2000); 'New England Peppermint grassy woodland on sedimentary or basaltic substrates' (VCA 534) of Benson *et al.* (2010). The community may also be referable to parts of 'New England Peppermint Woodland' (RVC14) of Eco Logical Australia (2009) mapped on sediments and basalts, however in the absence of any floristic plot data for RVC14, the relationship between the two assemblages is uncertain. New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion belongs to the 'Tableland Clay Grassy Woodlands' class of Keith (2004).
- New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion has been recorded from the local government areas of Armidale Dumaresq, Glen Innes Severn Shire, Guyra, Inverell, Tenterfield and Uralla, and may occur elsewhere in the Bioregion. Stands of New England Peppermint Woodland mapped on basalt and sediments by Eco Logical Australia (2009) within the eastern portion of the Namoi Catchment, within the Walcha and Tamworth Regional local government areas, may also be referable to the community as described above.
- New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion has been extensively cleared for grazing and agricultural development because it often occurs on flat and relatively fertile soils (Benson 1999). For example, within the Guyra mapsheet only 2 300 ha (approximately 11%) of

the original distribution remains (Benson and Ashby 2000) and this is indicative of a very large reduction in geographic distribution. Much of the remaining areas are in poor condition, with the understorey dominated by exotic plant species (Benson and Ashby 2000). Disturbed remnants are considered to form part of the community, including where the vegetation would respond to assisted natural regeneration, such as where the natural soil and associated seedbank are still at least partially intact. Clearing has dramatically decreased the extent of occurrence of the community and the resulting fragmentation has made New England Peppermint Woodland more vulnerable to other threatening processes such as weed invasion. 'Clearing of native vegetation' is listed as a Key Threatening Process under the Threatened Species Conservation Act 1995.

10. Weed invasion is a major threat to New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion and a large proportion of remnant stands no longer support a native understorey (Benson and Ashby 2000, Benson *et al.* 2010). The following exotic species have been recorded in the community:

<i>Aira elegantissima</i>	Delicate Hairgrass
<i>Anthoxanthum odoratum</i>	Sweet Vernal Grass
<i>Briza minor</i>	Shivery Grass, Small Shivery Grass, Quaking Grass
<i>Bromus brevis</i>	
<i>Bromus hordeaceus</i>	Soft Brome
<i>Centaureum erythraea</i>	Common Centaury
<i>Centaureum tenuiflorum</i>	
<i>Cerastium vulgare</i>	Mouse Ear Chickweed
<i>Cirsium vulgare</i>	Spear Thistle
<i>Conyza sumatrensis</i>	Tall Fleabane
<i>Dactylis glomerata</i>	Cocksfoot
<i>Festuca pratensis</i>	Meadow Fescue
<i>Gamochaeta coarctata</i>	
<i>Holcus lanatus</i>	Yorkshire Fog
<i>Hypochaeris radicata</i>	Catsear, Flatweed
<i>Leucanthemum vulgare</i>	Ox-eye Daisy
<i>Lolium perenne</i>	Perennial Ryegrass
<i>Modiola caroliniana</i>	Red-flowered Mallow
<i>Paronychia brasiliiana</i>	Chilean Whitlow Wort, Brazilian Whitlow
<i>Paspalum dilatatum</i>	Paspalum
<i>Petrorhagia nanteuilii</i>	
<i>Plantago lanceolata</i>	Lamb's Tongues, Plantain
<i>Rosa rubiginosa</i>	Sweet Briar, Eglantine
<i>Rubus ulmifolius</i>	Blackberry
<i>Taraxacum officinale</i>	Dandelion, Pissabed
<i>Trifolium arvense</i>	Haresfoot Clover
<i>Trifolium campestre</i>	Hop Clover
<i>Trifolium glomeratum</i>	Clustered Clover
<i>Trifolium repens</i>	White Clover
<i>Vulpia myuros</i>	Rat's Tail Fescue

'Invasion of native plant communities by exotic perennial grasses' and 'Loss and degradation of native plant and animal habitat by invasion of escaped garden plants, including aquatic plants' are listed as Key Threatening Processes under the Threatened Species Conservation Act 1995.

11. New England Peppermint (*Eucalyptus nova-anglica*), the dominant species of the community, is highly susceptible to eucalypt dieback and is the species most affected by eucalypt dieback on the New England Tablelands (Nadolny 2008). The causes of dieback are complex, however outbreaks of leaf-eating insects are a major factor since these insects can repeatedly defoliate trees. Between 2008 and 2010, New England experienced the worst outbreak of scarab beetles (*Anoplognathus* spp.) in approximately 25 years (C Nadolny *in litt.* Jan 2010). New England Peppermints have been severely defoliated over an area extending more than 100 km, from south of Walcha to at least Guyra in the north. Insect outbreaks have been intensified by land use practices such as developed pasture and fertiliser application that increase food availability for insects. Fragmentation and the decline of native insectivores further reduce the community's resilience to dieback (Nadolny 2008).
12. Climate change may pose an important threat to New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion, including the potential to exacerbate other threats such as weed invasion and dieback. Nadolny (2008, *in litt.* Jan 2010) suggests that high summer rainfall is favourable

for scarab beetles which preferentially feed on *Eucalyptus nova-anglica*, and that summer rainfall in the New England Tablelands is predicted to increase. The community is likely to be adversely affected by higher temperatures, particularly warmer winter minimums and fewer frosts, as it generally occupies 'frost hollow' situations at high elevations, and much of its current distribution could be replaced by other communities (Eco Logical Australia 2009). Changes to fire regimes and intensity predicted under climate change scenarios could lead to changes in the understorey composition and the shrub layer may also become more prominent. 'Anthropogenic Climate Change' is listed as a Key Threatening Process under the Threatened Species Conservation Act 1995.

13. New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion continues to be threatened by further clearing of remnants, grazing of the understorey, dieback, pasture improvement and weed invasion. Collectively, these threats are indicative of a very large reduction in ecological function.
14. New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion is very poorly reserved throughout its range. Less than 3% of the remaining area is thought to occur within the conservation estate (Benson and Ashby 2000, Benson *et al.* 2010). Reserves containing the community include Bolivia Hill, Booroolong, Duval, Imbota and Yina Nature Reserves.
15. New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion provides habitat for a number of threatened plant and animal species (Benson *et al.* 2010) listed under the Threatened Species Conservation Act 1995:

<i>Eucalyptus nicholii</i>	Narrow-leaved Black Peppermint	Vulnerable
<i>Thesium australe</i>	Austral Toadflax	Vulnerable
<i>Stagonopleura guttata</i>	Diamond Firetail	Vulnerable
<i>Melanodryas cucullata cucullata</i>	Hooded Robin (South-eastern form)	Vulnerable
<i>Phascolarctos cinereus</i>	Koala	Vulnerable
<i>Chthonicola sagittata</i>	Speckled Warbler	Vulnerable

16. The New England Peppermint (*Eucalyptus nova-anglica*) Woodland on Basalts and Sediments in the New England Tableland Bioregion is eligible to be listed as a Critically Endangered Ecological Community as, in the opinion of the Scientific Committee, it is facing an extremely high risk of extinction in New South Wales in the immediate future, as determined in accordance with the following criteria as prescribed by the Threatened Species Conservation Regulation 2010:

Clause 17 Reduction in geographic distribution of the ecological community

The ecological community has undergone, is observed, estimated, inferred or reasonably suspected to have undergone or is likely to undergo within a time span appropriate to the life cycle and habitat characteristics of its component species:

- (a) a very large reduction in geographic distribution.

Clause 19 Reduction in ecological function of the ecological community

The ecological community has undergone, is observed, estimated, inferred or reasonably suspected to have undergone or is likely to undergo within a time span appropriate to the life cycle and habitat characteristics of its component species:

- (a) a very large reduction in ecological function,
as indicated by any of the following:
- (d) change in community structure,
(e) change in species composition,
(f) disruption of ecological processes,
(g) invasion and establishment of exotic species,
(h) degradation of habitat.
(i) fragmentation of habitat.

FISHERIES MANAGEMENT ACT 1994

Section 76

Instrument of Determination of Management Charge for 1 July 2013 to 30 June 2014

I, ANDREW GOULSTONE, Director, Commercial Fisheries, with the delegated authority of the Minister for Primary Industries and the Director-General of the Department of Trade and Investment, Regional Infrastructure and Services pursuant to sections 227 and 228 of the Fisheries Management Act 1994 ("the Act"), do by this instrument of determination pursuant to sections 76 (1) and (2) of the Act, determine the management charge for the period 1 July 2013 to 30 June 2014 payable by holders of shares in any of the relevant share management fisheries in respect of each fishing business the components of which include shares in one or more of the relevant share management fisheries as follows:

1. If the components of a fishing business include shares (of any class) in one or more of the relevant share management fisheries, the management charge in respect of that fishing business (the *management charge*) is the total of the following amounts:
 - (a) for the first class of shares held by the fishing business – \$1,064;
 - (b) for the second class of shares held by the fishing business – \$1,064;
 - (c) for the third and each subsequent class of shares held by the fishing business – the discounted amount for that class of shares;
 - (d) \$500.
2. The *discounted amount* for a class of shares is calculated as follows:
 - (a) for the third class of shares held by the fishing business – \$638 (being 60% of \$1,064, rounded to the nearest dollar);
 - (b) for the fourth class of shares held by the fishing business – \$383 (being 60% of the discounted amount for the third class of shares held by the fishing business, rounded to the nearest dollar);
 - (c) for the fifth class of shares held by the fishing business – \$230 (being 60% of the discounted amount for the fourth class of shares held by the fishing business, rounded to the nearest dollar);
 - (d) for the sixth class of shares held by the fishing business – \$138 (being 60% of the discounted amount for the fifth class of shares held by the fishing business, rounded to the nearest dollar);
 - (e) and so on until all classes of shares held by the fishing business have been accounted for.

Note: The last column of the Table in the Attachment to this determination sets out the total management charges calculated in accordance with clauses 1 and 2 of this determination.

3. If the components of a fishing business for which a management charge is payable include a southern fish trawl endorsement, the calculation of the management charge is modified as follows:
 - (a) the southern fish trawl endorsement is to be treated as if it were the first class of shares held by the fishing business;
 - (b) in subclause 1. (a) of this determination, the amount to be added for that first class of shares is nil.

Note: No management charge is included for the southern fish trawl endorsement because an annual contribution of \$1,064 is payable in respect of that endorsement under section 115A of the Act.

4. For the purposes of this determination, a class of shares is held by a fishing business if the shares are a component of that fishing business on 1 November 2013.

In this determination:

class of share means a class of share in a relevant share management fishery, as listed in:

- (a) clause 5 of the Appendix to the Fisheries Management (Estuary General Share Management Plan) Regulation 2006;
- (b) clause 5 of the Appendix to the Fisheries Management (Estuary Prawn Trawl Share Management Plan) Regulation 2006;
- (c) clause 5 of the Appendix to the Fisheries Management (Ocean Hauling Share Management Plan) Regulation 2006;
- (d) clause 4 of the Appendix to the Fisheries Management (Ocean Trap and Line Share Management Plan) Regulation 2006;
- (e) clause 4 of the Appendix to the Fisheries Management (Ocean Trawl Share Management Plan) Regulation 2006.

relevant share management fishery means any of the following share management fisheries, as described in Schedule 1 to the Act:

- (a) the estuary general fishery;
- (b) the estuary prawn trawl fishery;
- (c) the ocean hauling fishery;
- (d) the ocean trawl fishery;
- (e) the ocean trap and line fishery.

southern fish trawl endorsement has the same meaning as it has in the Fisheries Management (General) Regulation 2010.

Made this 25th day of September 2013.

ANDREW GOULSTONE,
Director, Commercial Fisheries,
Department of Primary Industries

(an office within the Department of Trade and Investment, Regional Infrastructure and Services)

'Public Holiday' means a day specified in section 4 of the Public Holidays Act 2010, any day specified by the Minister administering that Act as an additional public holiday in accordance with section 5 of that Act, or any day specified by the Minister administering that Act as a substituted day in accordance with section 6 of that Act.

'Tolls' mean all road, bridge, ferry, tunnel and airport tolls that apply to a journey and, in respect of a northbound journey over the Sydney Harbour Bridge or through the Sydney Harbour Tunnel, mean an amount equal to the toll applicable to southbound traffic at the time of the hirer's northbound journey.

'Urban Area' means those parts of New South Wales specified in Schedule 1.

PRACTICE NOTE DC (CIVIL) No. 14

Extension of Time for Service of
Statements of Claim in Debt Claims

THIS Practice Note supersedes the previous Practice Note issued on 6 May 2011 referable to the extension of time for the service of statements of claim in debt claims.

This Practice Note is issued pursuant to the court's power contained in section 14 of the Civil Procedure Act 2005 to dispense with any requirement of the rules of court where appropriate. It applies only to matters in which claims are made only for a debt or liquidated claim. It does not apply to matters that are the subject of case management.

The requirement in Rule 6.2 that originating process is to be served on a defendant in New South Wales within one month after commencement is dispensed with in any matter to which this Practice Note applies and instead may be served up to 6 months from commencement.

Dated: 20 September 2013.

Chief Judge

PRACTICE NOTE SC CL 2

Supreme Court Common Law Division –
Criminal Proceedings

Commencement

1. This Practice Note was issued on 20 September 2013 and commences 1 October 2013.

Application

2. This Practice Note applies to committals for trial or sentence and ex-officio indictments in the Criminal List of the Common Law Division.

Definitions

3. None applicable.

Introduction

4. The purpose of this Practice Note is:
 - (a) to ensure that criminal proceedings are dealt with in a timely and efficient way, consistent with the parties' obligations under Chapter 3, Part 3 of the Criminal Procedure Act 1986; and
 - (b) to assist an accused person to take advantage of legislation which provides for a discount in sentence where an early plea of guilty is entered.

Listing for arraignment

5. Arraignments are held on the first Friday of each month in Sydney.
6. When committing an accused person for trial or sentence to the Supreme Court, the magistrate will direct the person to appear at the next arraignment, not less than four weeks after the date of the committal. If this practice would result in a January date, the matter will be listed on the first Friday in February.
7. Ex-officio criminal prosecutions will be listed by the Registry in the same way.

Arraignment procedures

8. On the day fixed for the arraignment, the Director of Public Prosecutions shall present an indictment to the Court and shall provide copies of the indictment for each accused person.
9. The court expects matters to be ready to proceed at the arraignment so that a trial date can be given. Legal representatives are expected to identify the issues for trial and estimate the likely hearing time required. The arraignment judge may give directions and rulings as to the conduct of the trial.
10. Unless the court makes a specific direction pursuant to sections 141 (3) or 148 of the Criminal Procedure Act, the standard directions that are to apply at the arraignment are:
 - (a) The prosecution is to file and serve on the accused notice of the prosecution case in accordance with s 142 no later than eight weeks before the trial date.
 - (b) The defence is to file and serve on the prosecution a defence response in accordance with s 143 no later than five weeks before the trial date.
 - (c) The prosecution is to file and serve on the accused a prosecution response to the defence response in accordance with s 144 no later than three weeks before the trial date.

- (d) The defence is to provide notice of alibi within the period prescribed in s 150 of the Criminal Procedure Act and
- (e) The parties are to hold a pre-trial conference before the trial judge pursuant to s 140 of the Criminal Procedure Act two weeks prior to the trial date to determine whether the parties can reach agreement regarding the evidence to be admitted at the trial. This does not apply if the accused is not legally represented.
- (f) In the event of non-compliance by a party with this practice note, or with any other direction made by the court, the court may contact the offending party directly, or list the matter for mention, either of its own motion or at the request of either party.

Entering a plea

11. Upon presentation of the indictment, the accused person will be arraigned by the Court and shall enter his or her plea. The Court may, if the indictment is not presented on the day fixed for the arraignment of the accused person, fix a further date for the arraignment of the accused and the presentation of the indictment.

Trial

12. By the date set for the trial, the matter must be ready to proceed. If there is an unavoidable problem or change to the conduct or length of the trial, legal practitioners are to notify the Criminal Registry or the Criminal List judge at the earliest possible stage to avoid inconvenience to jurors and witnesses.
13. An application to vacate a trial date:
 - (a) is to be made by way of Notice of Motion with a supporting affidavit, setting out the grounds for the application
 - (b) shall be made to the Criminal List judge, unless the application is made within two weeks of the date fixed for trial; and
 - (c) that is made within two weeks of the date fixed for trial, may be made to the Criminal List judge or to the trial judge.

Direction under Section 128 of the Criminal Procedure Act 1986

14. Prosecuting authorities are directed to present all indictments in the District Court, rather than in the Supreme Court, except for indictments relating to offences under any of the following sections:
 - ss 12, 19A, 21, 22A and 24 of the Crimes Act 1900;
 - ss 24, 24AA, 24AB and 78 of the Crimes Act 1914 of the Commonwealth;
 - s 9 of the War Crimes Act 1945 of the Commonwealth;
 - s 7 of the Geneva Conventions Act 1957 of the Commonwealth;
 - s 8 of the Crimes (Internationally Protected Persons) Act 1976 of the Commonwealth;

offences for which the maximum penalty is life imprisonment in a case in which either the Director of Public Prosecutions (Commonwealth) or the Director of Public Prosecutions of New South Wales has formed the opinion that the imposition of a life sentence may be appropriate.

15. It will be noted that, by reason of Clause 22 of the Criminal Procedure Regulation 2005, the District Court currently does not have jurisdiction in respect of sections 12 and 19A of the Crimes Act 1900.
16. Subject to the usual practice as to joinder of counts, an indictment charging an offence under any of the above sections may also contain counts charging other offences.
17. Applications for exemption under s 128 (2) of the Criminal Procedure Act 1986 should be made by letter addressed to the Chief Justice setting out a brief description of the nature of the case and identifying the basis upon which it is claimed that it is an appropriate case to be tried in the Supreme Court. Matters that involve particular difficulty, or that are test cases or in which there is particular public significance, will ordinarily be given an exemption.
