Definitions

6. In this Notice of Exemption:

Asphalt matrix means the solid material typically comprising of sand, aggregates and similar materials bound together with bituminous and/or other similar binders.

Coal tar means the by-product of the thermal processing of coal and means material that has or reasonably is suspected to have present volatile organic contaminants, such as phenols, as well as other toxic materials such as polycyclic aromatic hydrocarbons (PAHs).

Consumer means a person who applies, causes, or permits the application to land of reclaimed asphalt pavement within the definitions of “application to land” in accordance with the Act. The consumer may be the landholder responsible for the land to which reclaimed asphalt pavement is applied.

Detectable quantity of coal tar means the coal tar deemed to be present in an asphalt matrix when it gives a positive red colour result when tested using RTA Test Method T542.

Processor means a person who processes, mixes, blends, or otherwise incorporates reclaimed asphalt pavement into a material for supply to a consumer.

Reclaimed asphalt pavement means an asphalt matrix which was previously used as an engineering material and which must not contain a detectable quantity of coal tar or asbestos.

Relevant waste means reclaimed asphalt pavement that additionally satisfies the requirements of Section 7.

General conditions

7. This Notice of Exemption is subject to the following conditions:

- 7.1. The reclaimed asphalt pavement can only be:

- 7.1.1. Applied to land for road related activities including road construction or road maintenance activities, being:

- (a) use as a road base and sub base,
(b) applied as a surface layer on road shoulders and unsealed roads, and
(c) use as an engineering fill material.

- 7.1.2. Used as an alternative raw material in the manufacture of asphalt.

Processor responsibilities

8. The following conditions must be met by the processor for this exemption to apply:

- 8.1. The processor must implement procedures to minimise the potential to receive or process waste containing asbestos. These procedures must be formally documented and the records of compliance must be kept for a period of three years.

- 8.2. The processor must implement procedures to minimise the potential to receive or process waste in which the asphalt matrix contains detectable quantities of coal tar. These procedures must be formally documented and the records of compliance must be kept for a period of three years.

- 8.3. Records of the quantity of reclaimed asphalt pavement supplied to the consumer and either the consumer’s name and address or the registration details of the vehicle used to transport the reclaimed asphalt pavement, must be kept for a period of three years.

- 8.4. The processor of reclaimed asphalt pavement must provide a written statement of compliance to the consumer with each transaction, certifying that the reclaimed asphalt pavement complies with the relevant conditions of this exemption.

Consumer responsibilities

9. The following conditions must be met by the consumer for this exemption to apply:

- 9.1. The reclaimed asphalt pavement can only be reused or applied to land in accordance with Section 7.

- 9.2. The consumer must land apply the relevant waste within a reasonable period of time.

Exemption Granted

CHRISTOPHER McELWAIN,
Manager, Waste Management,
Environment Protection Authority
by delegation

Notes

The consumer should assess whether or not the exempted material is fit for the purpose the material is proposed to be used and whether this use will cause harm. The consumer may need to seek expert engineering or technical advice.

Typical areas where asphalt is likely to contain coal tar include: airports, bus depots, shipping container terminals, shipyards, any area subjected to oil and fuel spillages, and roads constructed prior to 1987. Early warning of the presence of coal tar is indicated by the distinctive phenolic

odours when the asphalt matrix is being processed by milling/planing or being otherwise heated.

The EPA may amend or revoke this exemption at any time. It is the responsibility of the generator, processor and consumer to ensure that they comply with all relevant requirements of the most current exemption. The current version of an exemption will be available on the EPA website: www.environment.nsw.gov.au.

In gazetting this general exemption, the EPA is exempting the relevant waste from the specific requirements of the Act and Regulations as stated in this exemption. The EPA is not in any way endorsing the use of this substance or guaranteeing that the substance will confer benefit.

The use of exempted material remains subject to other relevant environmental regulations within the Act and Regulations. For example, a person who pollutes land (s142A) or water (s120), or does not meet the special requirements for asbestos waste (clause 42), regardless of having an exemption, is guilty of an offence and subject to prosecution.

For the purposes of arrangements between a generator, a processor and a consumer, a 'transaction' is taken to mean the contractual agreement between the two parties which specifies the exchange of waste material from one party to another. A 'statement of compliance' must be in writing and be provided with each transaction.

The conditions set out in this exemption are designed to minimise the risk of potential harm to the environment, human health or agriculture, however, neither this exemption nor these conditions guarantee that the environment, human health or agriculture will not be harmed.

This exemption does not apply to any material received at a premises that is required to be licensed for waste disposal (application to land) activities under the provisions of the Act. This exemption does not remove the need for a site at which processing occurs to be licensed, if required under Schedule 1 of the Act.

This exemption does not alter the requirements of any other relevant legislation that must be met in utilising this material, including for example, the need to prepare a Material Safety Data Sheet (MSDS).

Regardless of any exemption provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with the development consent requirements of the land.

All records required to be kept under this exemption must be made available to authorised officers of the EPA upon request.

Failure to comply with the conditions of this Notice of Exemption may constitute an offence under clause 51 of the Regulation and the responsible person will be required to comply with the normal regulatory provisions.
